Speciality Magnetic Cores and Components

CURRENT SENSORS FOR RENEWABLE ENERGY

Qualified to ISO 9001:2000

Telcon Current Sensors For Renewable Energy

Solar tracking

- World investment in the energy market is growing at 15% per annum

- Telcon has a wide range of current sensors well suited for the renewable market

- A three phase differential current sensor for detecting AC & DC leakage currents in a grid connected photovoltaic system

- A miniature AC current transformer to provide 0.1% accuracy measurement of the output of a large wind turbine

- Telcon's experience in this field has enabled us to design custom products to meet customer requirements

At the heart of our operations is a powerful and innovative design team able to take advantage of new developments in materials and processes.
